ACCESSORIES

RECHARGEABLE BATTERY PACK SBC6411(supplied with AZ6813)

Instead of the battery holder, the rechargeable battery pack SBC6411 can be used. This package can be charged when it is placed in the set which is connected via the AC/DC-adaptor to the mains. It can also be charged outside the set when it is connected directly to the AC/DC adapter.

When the charging control on the backside of the package is off, the battery pack is 80% charged (after approx. 3 hours). After another 3 hours the battery pack is fully charged.

When the set is being used during charging, the charging time is longer.

- If the battery will not be used for a long period, store it fully charged outside the CD-player. Each battery, even when not in use, discharges slowly, so recharge the battery every 6 months to prevent it from being discharged completely.

CAR ACCESSORY KIT SBC 3557 (supplied with AZ6812)

Voltage converter (for 12 V, negative grounding only)

- This converter delivers 6 V/350 mA Direct Current, +  - pluspole + to the centre pin.
- First, connect the DC-plug to the 6 V DC socket.
- After that, insert the voltage converter into the cigar-lighter socket. If necessary, clean the cigar lighter socket to obtain a good electrical contact.
- Always remove the converter from the cigar-lighter socket when the CD-player is not in use and when listening to the radio.

Cassette adapter

Find a good and safe place for the CD-player:

- on a vibration-free and stable surface;
- not dangerous or interfering for the driver or passengers;
- avoid excessive heat from the car heating or from direct sunshine, e.g. when parking in the sun and avoid moisture, dust and dirt.
- Turn down the volume of your car radio cassette-player.
- Connect the cassette-adapter plug to the socket LINE OUT of the CD-player.
- Slide the cassette carefully into the car radio cassette player.
- Adjust the VOLUME control of the CD-player to position 4, switch off DBB and adjust the sound with the controls of the car radio.
- To remove the cassette adapter, press the eject button of the cassette player.

GENERAL MAINTENANCE

- The mechanism of the CD-player is fitted with self-lubricating bearings and therefore must not be oiled or greased.
- Fingerprints, dust and dirt on the apparatus can be removed using a soft, clean and slightly damp leather cloth. Do not use any cleaning agents which contain abrasives or solvents such as benzine thinner, alcohol, refined petrol or ammonia, since they may affect and harm the cabinet.
- Do not expose the set, batteries or discs to rain or moisture, or, for any great length of time, to excessive heat from heating equipment or direct sunshine, e.g. in cars parked in the sun.
- Keep the set and the discs away from sand.

CD-PLAYER AND DISCS

- The lens (X) (fig. 3) should never be cleaned.
- The lens may steam up when the set is taken from a cold into a warm environment. Playing a disc is not possible then. Do not clean the lens, but let the set acclimatize for a while.
- Always pick up the disc by the edge and put it back in its box immediately after use.
- To remove dirt from a disc, first breathe on the disc and wipe it off in a straight line from centre to edge (fig. 4) using a soft, lint-free cloth. The use of cleaning agents may harm the disc.

PLAYING A DISC

- Ensure that the CD HOLD switch is in position OFF.
- Connect headphones to the socket Ω .
- Press OPEN to open the disc cover.
- Insert the disc, printed side facing up (fig. 2) and close the cover.
- Adjust the sound with the VOLUME control and the DBB bass slider.
- Playback will start by pressing PLAY ▷. As soon as playback starts, the display shows the track number 1. When the second title is reached, number 2 appears, etc.
- For brief interruptions, press PAUSE ||. The word PAUSE appears. To continue playback, press PAUSE || again.
- To stop playback, press STOP. Now the display shows the total number of tracks present on the disc.
- The CD player also goes to position STOP: – when the end of the disc is reached; – by opening the disc cover; – if the batteries run down or if the power supply is interrupted in another way.
- Open the disc cover only if the CD-player is in position STOP.
- In the STOP position, the CD-player automatically shuts down 30 seconds after the last command when battery supply is used and goes to stand-by when the AC/DC adapter is connected.

**Remarks**

- If the batteries get exhausted, the CD-player will not function normally, e.g. it does not start. In this case, replace the batteries or connect a mains adapter to the 6 V DC socket.
- If **PLAY** is pressed and the CD-player shuts down after some seconds, the CD-player cannot read the disc. Possible causes are:
 - you inserted the disc the wrong way: the label should face up (fig. 2);
 - the surface of the disc is badly scratched or dirty, see 'Maintenance';
 - the lens (X) (fig. 3) is steamed up because of a sudden transition from a cold into a warm environment; do not clean the lens, but let the set acclimatize for a while;
 - the batteries are exhausted. Replace the batteries or connect a mains adapter.

STANDBY

If the set is supplied by the AC/DC adapter, the set is not shut down 30 seconds after the last command in the STOP position but is switched to stand-by mode. In this mode the stored titles and selected functions are not cleared.

By pressing one of the CD-control keys (or remote control keys) the set can be activated again.

MODE (SHUFFLE and REPEAT)

- 4 x REPEAT to repeat the the actual title continuously;
- 5 x NORMAL (no display indication) to defeat the SHUFFLE and REPEAT modes.

If the word MEMORY is also visible on the display only the titles stored in the memory will be played.

To defeat the REPEAT and SHUFFLE mode, choose position NORMAL (no display indication).

CD HOLD

When carrying the player with you, you can set the CD HOLD switch to ON. HOLD appears on the display. The CD-control keys are then inoperative (except for the REMOTE control keys). Now, playing a disc is not interrupted when a button is accidentally touched.

For operating the normal CD-buttons, place the CD HOLD switch to position OFF again.
